JOINT MISSION COVERAGE SUMMARY

Mission B 4114
14 April 1959

Summary of Coverage

Mission B 4114, flown 14 April 1959, covered the coast of Albania and the western portion of the interior, as well as the adjacent Bar-Titograd area of Yugoslavia. The submarine station at Pasha Liman was covered, the Durres, Tirane and Vlone areas, and numerous defense installations and airfields.

Quality

Quality of the photographic coverage is generally fair to good in the Vlone and Durres areas and fair to poor elsewhere in the mission. Most of the targets appeared in the three right oblique positions. Distance robbed the images of much of the detail which interpretation requires.

Sheet G 4 Kerkira Sheet Y 46 Shkoder
Sheet Y 33/34 Mostar Sheet Y 47 Prizren

Notes

1. Information is listed by categories as shown in the Table of Contents. Within categories the arrangement of airfields and urban areas is alphabetical by country. The arrangement of other categories is by (1) country, (2) WAC number, and (3) degree square. An index of geographic names follows the text.

2. The abbreviation ASSOTW in the report stands for the "Airfields and Seaplane Stations of the World" series. ATMP designates mosaics and charts in the "Air Target Materials Program" series.

3. Coordinates of coastal locations sometimes fall in water when obviously dry targets are described. This is the result of using the lower left corner of each one-minute square to locate the square and everything in it, a matter of economy and convenience.
